KC: Knowledge or Co	ntent / SK [.] Skills / AB	Abilities					Tota	l: 6

ENAEE LEARNING RESULTS

ENA101 - Knowledge and comprehension: Knowledge and understanding of mathematics and other basic sciences inherent in them engineering speciality, at a level that allows them to acquire the other competencies of the degree.

ENA104 - Analysis in engineering: The ability to analyse complex products, processes and systems in their field of study; choose and apply relevant analytical, calculation and experimental methods in a suitable way; and correctly interpret the results of such analyses.

ENA106 - Engineering projects: Ability to project, design and develop complex products (parts, components, finished products, etc.), processes and systems of their speciality, which meet the established requirements, including awareness of the social, health and safety, environmental, economic and industrial aspects, as well as selecting and applying appropriate project methods.

ENA113 - Practical application of engineering: Knowledge of application of materials, equipment and tools, engineering technology and processes, and their limitations in the field of their speciality.

ENA119 - Communication and Teamwork: Ability to effectively communicate information, ideas, problems and solutions in the field of engineering and with society in general.

ENA120 - Communication and Teamwork: Ability to operate effectively in domestic and international contexts, individually and as a team, and to cooperate with both engineers and people from other disciplines.

SECONDARY LEARNING RESULTS

LEARNING ACTIVITIES	СН	NCH	ТН
Conducting tests, giving presentations, presenting defences, taking examinations and/or doing checkpoints	2 h.	5 h.	7 h.
Computer simulation exercises, individually and/or in teams	1 h.	7 h.	8 h.
Presentation by the teacher in the classroom, in participatory classes, of concepts and procedures associated with the subjects	17 h.	3 h.	20 h.
Carrying out exercises and solving problems individually and/or in teams	36 h.	17 h.	53 h.
Carrying out work experience in real environments and writing the corresponding report	6 h.	5 h.	11 h.

y millions of engineers and scientists to analyze data, deve	elop algori	tims and create models.

Course: 2024 / 2025 - Course planning

	W	MAKE-UP MECHANISMS
Reports on the completion of exercises, case studies, computer exercises, simulation exercises, laboratory exercises, term projects, challenges and problems	100%	Reports on the completion of exercises, case studies, computer exercises, simulation exercises, laboratory exercises, term projects, challenges and problems Comments: - Continuous assessment It may be asked to redo the document.
CH - Class hours: 1,5 h. ICH - Non-class hours: 1,5 h. 'H - Total hours: 3 h.		
2RGE194 (2 sem)		
LEARNING ACTIVITIES		СН ИСН ТН
Development and writing of records, reports, presentatic projects/work experience/challenges/case studies/exper individually and/or in teams	imental inve	ual material, etc. on 1,5 h. 1,5 h. 3 h. stigations carried out
Development and writing of records, reports, presentation projects/work experience/challenges/case studies/exper		ual material, etc. on 1,5 h. 1,5 h. 3 h.

LEARNING ACTIVITIES	СН	NCH	тн
Conducting tests, giving presentations, presenting defences, taking examinations and/or doing checkpoints	2 h.		2 h.
Computer simulation exercises, individually and/or in teams	1 h.	3 h.	4 h.
Presentation by the teacher in the classroom, in participatory classes, of concepts and procedures associated with the subjects	8 h.	2 h.	10 h.
Carrying out exercises and solving problems individually and/or in teams	10 h.	6 h.	16 h.
Carrying out work experience in real environments and writing the corresponding report	2 h.	2 h.	4 h.

Comments: *Some exercises will be solved with MATLAB. MATLAB is a leading programming and numerical calculation platform used by millions of engineers and scientists to analyze data, develop algorithms and create models.

EVALUATION SYSTEM	W	MAKE-UP MECHANISMS
Reports on the completion of exercises, case studies, computer exercises, simulation exercises, laboratory	13,2%	Individual written and/or oral tests or individual coding/programming tests
exercises, term projects, challenges and problems		Prototype / Product
Individual written and/or oral tests or individual coding/programming tests	83,5%	Comments: - Students with less than a 5 at the control point must retake the exam Final note of the control point: control point 25%
Prototype / Product	3,3%	and retake 75% For the courseworks, their correction will be
Comments: - Control point: minimum grade 5 Coursev minimum grade 5 PBL project grade: 30% product, 20% content of the report and 50% individual technical defense	technical	asked. The maximum mark for the corrected courseworks will be 5.0 In the project / PBL there will not be any retake of the individual defense.
CH - Class hours: 23 h.		

NCH - Non-class hours: 13 h.

TH - Total hours: 36 h.

2RGE192 (2 sem)

LEARNING ACTIVITIES			СН	NCH	ТН
Carrying out/resolving projects/challenges/cases, etc. to pro interdisciplinary contexts, real and/or simulated, individually	2 h.	1 h.	3 h.		
EVALUATION SYSTEM	W	MAKE-UP MECHANI	SMS		
Observation (technical capacity, attitude and participation)	100%	Observation (technica Comments: Continuo			ticipation)
CH - Class hours: 2 h. NCH - Non-class hours: 1 h. TH - Total hours: 3 h.					

CONTENTS

- 1. Ordinary differential equations
- First order ODEs: separable, homogeneous, linear and Bernouilli type
- Second and higher order ODE
- Resolution of problems in Physics and Mathematics
- 2. Linear algebra
- Systems of linear equations
- Matrix algebra
- Determinants
- Vector spaces
- Diagonalization: eigenvalues and eigenvectors
- Inner product, norm and orthogonality
