SECONDARY LEARNING RESULTS

RA131 [!] Identifica y aplica algoritmos de planificación de trayectorias trabajando individualmente y en equipos multidisciplinares

LEARNING ACTIVITIES

Development and writing of records, reports, presentations, audiovisual material, etc. on projects/work experience/challenges/case studies/experimental investigations carried out individually and/or in teams

CH NCH TH

20 h. 15 h. 35 h.

EVALUATION SYSTEM

Individual written and/or oral tests or individual coding/programming tests

W

100%

MAKE-UP MECHANISMS

Individual written and/or oral tests or individual coding/programming tests

Comments: All activities (control points, individual and group work, etc.) must have a minimum grade of 5 and an opportunity for recovery (except the PBL). In unapproved training activities (less than 5) the recovery is compulsory and the final grade will be the grade obtained in the recovery. In the activities carried out it is necessary to obtain a minimum mark of 4 to calculate the average mark of the learning result. Otherwise, the note of the learning result will be that of the suspended activity. The system will calculate the final grade with the RA, applying the percentages defined in IKOF.

CH - Class hours: 20 h.

NCH - Non-class hours: 15 h.

TH - Total hours: 35 h.

RA132 [!] Desarrolla un control de trayectorias para navegación autónoma de un robot móvil sintetizando los factores que intervienen para realizar juicios éticos y cooperando para obtener la propuesta de manera participativa
