SECONDARY LEARNING RESULTS

RA141 [!] Diseña un controlador para una aplicación robótica comunicando sus conclusiones de manera argumentada

LEARNING ACTIVITIES	CH	NCH	TH
Conducting tests, giving presentations, presenting defences, taking examinations and/or doing checkpoints	2 h.		2 h.
Presentation by the teacher in the classroom, in participatory classes, of concepts and procedures associated with the subjects	11 h.	22 h.	33 h.

EVALUATION SYSTEM	W	MAKE-UP MECHANISMS
Individual written and/or oral tests or individual coding/programming tests	100%	Individual written and/or oral tests or individual coding/programming tests
Comments: All activities (control points, individual and group work, etc.) must have a minimum grade of 5 and an opportunity for recovery (except the PBL). In unapproved training activities (less than 5) the recovery is compulsory and the final grade will be the grade obtained in the recovery. In the activities carried out it is necessary to obtain a minimum mark of 4 to calculate the average mark of the learning result. Otherwise, the note of the learning result will be that of the suspended activity. The system will calculate the final grade with the RA, applying the percentages defined in IKOF.		

CH - Class hours: 13 h.

NCH - Non-class hours: 22 h.

TH - Total hours: 35 h.

RA142 [!] Diseña un controlador para una aplicación robótica en un contexto real o simulado innovando y colaborando de manera activa para evaluar y asumir la responsabilidad social implícita en la propuesta
